Trilogy Evo

Transitioning to the future. Advancing respiratory care today.

When you're treating respiratory patients, it's hard to know what today will bring. One thing is for sure, transitions can occur often, and for any number of reasons. Conditions escalate. Patients are moved. Therapy modes are changed. Each time, patient care is at risk of disruption, causing needless stress on the team. That's why Philips Respironics is making a transition of its own – to an even brighter future in respiratory care.

Philips Respironics is unveiling a platform of innovative Trilogy Evo ventilators. Bridging ground-breaking technology with enhanced data flow, Trilogy Evo helps benefit a broad spectrum of patients, from newborns to adults. Trilogy Evo is the only* portable life support ventilator platform designed to stay with patients and provide consistent therapy and monitoring as they change care environments and when their condition changes. So when transitions do occur, disruptions are reduced. Making today a much better day for clinicians, caregivers, and everyone who depends on them.
