

# IT'S LIKE AN ANNUAL PHYSICAL FOR YOUR CPAP.

A CPAP Checkup from CPAP Medic rids your device of mold, bacteria, viruses and even dead insects. Yep, insects. That's because your CPAP cleaner is only doing half the job – cleaning your mask, tubing and water chamber but not your CPAP device. Here's what a CPAP Checkup will do:

## **Revitalize**

We open up your CPAP machine (don't try this at home!) and do a deep internal cleaning.

## **Replenish**

We replace the filter and airtight seals to ensure peak performance.

## **Recertify**

We conduct a thorough quality test, check for malfunctions and update it with the latest manufacturer firmware. If we find any problems, we'll send you a no-obligation estimate for repair.
